

HIT!

High noon. The sun bakes the dusty thoroughfare. You slither into the local saloon and toss two bits to the barkeep for a swallow of whiskey. Don't mind if I do. A man in a wide-brimmed hat beckons from a table tucked away in the corner. Maybe today is the day your luck finally turns. The man kicks out a chair by way of invitation. You sit—and you will show no mercy.

Contents

90 loot cards (11x values 1-5, 7x values 6-10)

Game Setup

Shuffle all 90 loot cards together to form a facedown deck.

Game Play

The player with the largest hat begins and play proceeds clockwise.

On their turn, players first **check their play area**. If there are any faceup loot cards in front of you **at the beginning of your turn**, flip them over and place them in a **facedown** loot stack.

Cards in your loot stack **cannot be stolen**.

DRAWING LOOT CARDS

Next, draw cards from the top of the deck, **one at a time**, placing them **face up** in front of you.

Cards drawn should be arranged in **ascending order** from left to right according to their value.

You may stop turning over cards at any time, but **MUST STOP** when you turn over a card that matches a faceup card already in front of you (*see exception, below*).

When this occurs, all faceup cards in front of you are discarded and your turn **ends immediately**.

EXCEPTION: THE 3-CARD RESERVE

If you have **three or fewer faceup loot cards** in front of you, you may continue drawing even after revealing a matching card. Cards of the same value are added to those already in front of you to form a **single column**.

STEALING LOOT CARDS

After drawing each card, you may choose to **steal all faceup loot cards of the same value** from your opponents. Stolen cards are added to the group of faceup cards already in front of you.

End of Game

The game ends **immediately** when the last loot card in the deck is revealed and resolved.

When this occurs, all players add any faceup cards still in front of them to their loot stacks.

Each player now adds together the **total value** of all cards in their loot stack. **The player with the highest total value of loot cards is the winner.**
